

Wednesday 21st November

From 10.00am to 10.40am

Marco Voellink
 Regional Sales Manager

Overview, benefits and success stories of Enduron® HPGR technology.

From 10.40am to 11.20am

Igor Maksimov
 Cyclones Product Manager

Insights to cyclones in mill circuit applications and why their classification efficiency differs.

From 11.20am to 12.00am

Grant Stewart
 Product Manager – Vulco Products

From maintenance item to a high performance value product Vulco – an alternative to steel lining systems.

Biographies

Marco Voellink
 Regional Sales Manager

Marco Voellink developed his passion for mineral processing at a young age and pursued his dreams by studying mechanical engineering at Ruhr Universität Bochum.

Marco went on to develop his skills and experience by joining ThyssenKrupp Polysius as Project Manager, a global co-operation recognised for their surface mining and mineral processing capabilities and specialization in ore crushing, transportation and processing. Five years later, Marco joined Sandvik, an engineering business who specialize in mining and construction, where he joined as Application and Sales Manager responsible for the growth of the comminution product portfolio.

With over 12 years' experience in the mining industry, Marco is now working at Weir Minerals in the position of Key Account Manager for Enduron® HPGR, (High Pressure Grinding Rolls), bringing this new technology and its benefits to the mining sector. His experience and knowledge in this area has been key to driving Enduron® HPGR growth into the global mining market.

Igor Maksimov
 Cyclones Product Manager

Igor Maksimov is an enthusiastic product manager who has devoted the past twelve years in servicing clients within the mining and sand and aggregates sectors across Europe, North Africa, Kazakhstan and Turkey.

Having graduated in Physics from Donetsk State University in the Ukraine, Igor went on to do a PhD in Physics at the Technical University of Braunschweig in Germany.

With a passion for engineering and mineral processing, Igor joined Weir Minerals 13 years ago in an engineering role and is now using his technical aptitude and commercial knowledge to provide customers with effective solutions to their cyclone mineral processing requirements.

Grant Stewart
 Product Manager – Vulco Products

Grant Stewart has built a reputation for his passion in mineral processing and is renowned for his knowledge on the adoption of mill lining systems and how they can improved operational efficiency.

Grant has accumulated over 25 years' experience in servicing the mining sector across the Middle East, Europe and Africa. He is well positioned to use his technical expertise and business acumen to support customers in optimising their mill grinding operations and enhancing their profitability.

Grant's extensive field experience is key to developing innovative mill lining solutions for customers across the globe within the mining sector.
